SEÑORÍO DE P. PECIÑA

Bodegas Hermanos Peciña was founded in 1992 by Pedro Peciña Crespo with three children in a small vineyard in the heart of Rioja Alta - San Vicente de la Sonsierra. It is a perfect place to grow vines, set among the peaks of the Sierra Cantabria and the banks of the Ebro River, where the Atlantic and Mediterranean climates coexist, creating a microclimate that produces unique and unrivaled grapes.

The microclimate of the geographical location, which covers only about 40 square kilometers, gives the wines the necessary characteristics. The northerly wind reduces pests and rot, the daylight hours average 2,800 hours per year, and the rainfall (500mm per year) is ideal, forcing the plant to produce smaller clusters with a higher concentration of sugar and coloring matter.

The dominant grape is almost entirely Tempranillo, although there are also vineyards with red Garnacha and white Viura. In addition, in the oldest vineyards, the Graciano and Garnacha plants intertwine among the tempranillo grapes.

VILLABUENA
RIOJA ALAVESA

For over a century, the Cañas family vineyard has been producing and selling traditional young wines made by carbon maceration (whole grapes). In the past, the wines were transported by Carlos Cañas, father of Luis Cañas (who died in December 2019 at the age of 91), in mule-drawn wagons through the Sierra Cantabria and Montes de Vitoria to the areas bordering Bilbao and San Sebastián.

At the age of 33, Carlos's son Luis took over the reins and brought new climates to the vineyard, maintaining the work philosophy and family tradition, but not being satisfied with making only very good young wines, he also began to produce new wines, increasingly promoting mature wines. The personality of Juan Luis, one of the most restless and innovative winemakers in the country, has made the wines from this Bodega recognized around the world with the most prestigious awards.
